### Update: April 7, 2017

Previously announced excavation operations associated with the Water Transmission Line Replacement during the week of April 3rd went as planned. The 30-inch water line was shut down, tapped and a "Tee" section and valve was installed. New pipe was installed along 121st Street between 5th and 6<sup>th</sup> Avenues. And an exploratory excavation was completed on Northern Drive and 8<sup>th</sup> Street which validated the final connection point.

For the week of April 10 the intersection of 121st and 5th Avenue will be excavated to install pipe and fittings. This will require a shutdown of a 10-inch transmission line. Residents on 5th Avenue between 119th and 122nd Streets are expected to have some outages of water service and/or discolored water. Residents that will be affected will be notified by hand delivered flyer (if there is any concern over water quality residents will also be notified). Once complete, excavation operations will continue north on 5<sup>th</sup> Avenue.

For more information or questions pertaining to the Water Transmission Line Replacement Project, please contact the City of Troy Department of Public Utilities at (518) 237-0319 or (518)-237-0241 (after hours).
