Department of Public Utilities

25 Water Plant Road | Troy NY 12182

518-237-0438 | www.troydpu.org

Update: June 30, 2017

Work associated with the installation of the new 36-inch water transmission line will continue on 125th street between 5th Avenue and 8th Avenue. Replacement of piping in the vicinity of 121st Street and 3rd Avenue intersection requires the installation of a new 30-inch valve to allow for a complete shutdown of water lines in the intersection.

Upon completion of the intersection piping replacement, the current 33-inch water line will be taken out of service. It is anticipated that there is sufficient water for all users at this time while piping replacement operations continue. If there is an increase from the current water flow, water restrictions may need to be implemented for all users. Residents will be notified via the city website, social media channels and local news media outlets.

Additionally, drivers are asked to exercise caution and observe all posted road closures in the vicinity of the work area.

For more information or questions pertaining to the Water Transmission Line Replacement Project, please contact the City of Troy Department of Public Utilities at (518) 237-0319 or (518)-237-0241 (after hours).
